Professional Summary

Recent graduate Economist currently completing a placement at the Banco de México and working as a research assistant at SECIHTI. Experience in macroeconomic research and quantitative modeling (ARDL, VEC, SVAR, DSGE), with a focus on exchange rate dynamics, monetary policy, and time series analysis.

Education

National Autonomous University of Mexico (UNAM) – Faculty of Economics — Mexico City

B.A. in Economics; GPA: 9.94/10 (Mexican scale); Valedictorian — *08/2021 – 07/2026*

Freie Universität Berlin – School of Business and Economics — Berlin, Germany

Exchange semester — *04/2025 – 08/2025*

Experience and Teaching

Banco de México – General Directorate of Economic Research — Mexico City

Intern (social service), Macro-Financial Analysis Directorate — *07/2026 – present*

Work with economic and financial data, prepare technical summaries of academic papers, and develop the conceptual framework of the Divisia methodology for monetary aggregates, for its implementation in Mexico.

Secretariat of Science, Humanities, Technology and Innovation (SECIHTI) — Mexico City

Research Assistant to Professor Emeritus Martín Carlos Puchet Anyul — *09/2024 – present*

Explore methodologies to reconcile microeconomic data from ENIGH with national accounts to link income distribution with economic growth. Wrote an article in which we explain some findings from our research.

UNAM – Faculty of Economics — Mexico City

Teaching Assistant, Macroeconomic Theory I (Prof. Edgar Pérez Medina) — *02/2026 – 07/2026*

Poliestudia — Remote

Online English Teacher — *10/2022 – 08/2023*

Research and Projects

Evidence of Exchange Rate Overshooting in Mexico under the Inflation Targeting Regime (2001–2025) — B.A. thesis

Advisor: Dr. Juan Carlos Moreno Brid. — *Thesis under review*

Examine exchange rate dynamics in Mexico using ARDL models and a VEC model with cointegration to investigate long-run relationships and short-run adjustments. Developing a research paper based on these results with Dr. Juan Carlos Moreno Brid and Dr. Benjamín Oliva Sánchez.

Contribution to the Debate on Income Underestimation — Research article

Co-authors: Fernando Ferrer, Maxime Destinobles, and Martín Puchet. — *Manuscript under review*

Investigate discrepancies between household survey data (ENIGH) and national accounts in measuring household income and contribute to proposals for reconciling survey-based estimates with national accounting aggregates.

Banxico Challenge (Reto Banxico) — Monetary policy research

Semifinalist team, advised by Dr. Luis Daniel Torres. — *01/2026 – 06/2026*

Developed semi-structural and SVAR models to analyze domestic and international inflation environment, and contributed to a monetary policy recommendation. Presented our findings to officials of the Ministry of Finance (SHCP).

Update of the textbook *Economía Monetaria* — Editorial and data review

Collaboration with Dr. Carlo Panico, AEFE excellence scholarship program. — *09/2025 – 06/2026*

Contributed to the editorial review and produced charts for the updated edition.

SKILLS

Macroeconomic modeling: VAR/SVAR, VECM, ARDL, DSGE, QPM.

Programming: R, Python, MATLAB, SQL, LaTeX.

Software: Excel, MATLAB/Dynare, Stata, Power BI, Word, PowerPoint.

Languages: Spanish (native), English (fluent), German (advanced, B2 coursework), French (basic).

CERTIFICATIONS AND TRAINING

Machine Learning and Deep Learning	A2 Capacitación (10/2026)
Aspire Leaders Program (ALP), alumnus	Aspire Institute – Harvard (08–10/2026)
Introduction to VAR and SVAR Models in Stata	Faculty of Economics – UNAM (01/2026)
Introduction to DSGE Models in MATLAB/Dynare	Faculty of Economics – UNAM (12/2025)
Python with SQL	Faculty of Economics – UNAM (08/2025)
Advanced German courses (B2)	ENALLT – UNAM (01/2023 – present)
